

Water Cycle

1. Use the following terms to label the parts of the water cycle. Some words will be used more than once.
Evaporation,
Transpiration,
Precipitation,
Condensation,
Precipitation
2. Label 2 locations on the diagram where 'Collection' occurs.
3. Create a puzzle on a separate sheet to review these vocabulary terms. You may create a crossword puzzle, a fill-in-the-blank, or letter scramble. All puzzles must include definitions as clues. Include an answer key.

transpiration
plants open their pores for carbon dioxide and lose water to evaporation

Condensation
water vapor cools and changes back into liquid form

evaporation
water, driven by the heat of the sun, changes into vapor and rises into the air
